MATHEMATISCHE LOGIK  
UND  
GRUNDLAGENFORSCHUNG

*Herausgeber*

Hans Hermes, Freiburg i. Br.; Jürgen v. Kamps, Münster i. Westf.;  
Kurt Schütte, München; Wolfram Schwabhäuser, Stuttgart; John C. Shepherdson, Bristol;  
Ernst Specker, Zürich

*Beirat*

O. Ketonen, Helsinki; A. Tarski, Berkeley, Californien

*Unter Mitarbeit von*

W. Felscher, Tübingen; G. Hasenjaeger, Bonn; G. Kreisel, Stanford;  
P. Lorenzen, Erlangen; A. Oberschelp, Kiel; W. Stegmüller, München

**Band 21**

1981

VERLAG W. KOHLHAMMER  
STUTTGART · BERLIN · KÖLN · MAINZ

## Inhalt von Band 21

Saharon Shelah: <i>Models with second order properties. III. Omitting types for <math>L(Q)</math></i> . . .	1
J. A. Makowsky and S. Shelah: <i>The theorems of Beth and Craig in abstract model theory II. Compact logics</i> . . .	13
J. Makowsky and M. Ziegler: <i>Topological model theory with an interior operator: Consistency properties and Back- and Forth arguments</i> . . .	37
Jon Barwise: <i>The role of the Omitting Types Theorem in infinitary logic</i> . . .	55
T. v. d. Twer: <i>On the strength of several versions of Dirichlet's ("PIGEON-HOLE")-principle in the sense of first-order logic</i> . . .	69
Urs Oswald: <i>Inequivalence of the fragments of New Foundations</i> . . .	77
Horst Zeitler: <i>Die Amalgamierungseigenschaft und reine Ringe</i> . . .	83
Hugo Volger: <i>A unifying approach to theorems on preservation and interpolation for binary relations between structures</i> . . .	101
W. Pohlers: <i>Cut-elimination for impredicative infinitary systems. Part I. Ordinal-analysis for <math>ID_1</math></i> . . .	113
Leszek Pacholski: <i>Homogeneous limit reduced powers</i> . . .	131
Hans Kleine Büning: <i>Some undecidable theories with monadic predicates and without equality</i> . . .	137
Dieter Klaua: <i>Inhomogene Operationen reeller Ordinalzahlen</i> . . .	149
M. W. Bunder: <i>Predicate calculus and naive set theory in pure combinatory logic</i> . .	169
Michael v. Rimscha: <i>Universality and strong extensionality</i> . . .	179
Michael v. Rimscha: <i>Weak foundation and axioms of universality</i> . . .	195
